

I would like to personally invite you to attend the Public Meeting for the proposed Romney Wind Energy Centre.

In advance of the meeting I wanted to share with you some key project details:

- EDF EN Canada Development Inc. plans to submit the proposed Romney Wind Energy Centre into the competitive Large Renewable Procurement (LRP / RFP) process on September 1, 2015;
- The proposed Romney Wind Energy Centre is in the early stages of planning, therefore all project design and layout information is preliminary;
- EDF EN Canada Development Inc. will host more public meetings as the project planning continues;
- There is no contract yet with the Ontario government.

EDF EN Canada Development Inc. operates differently than other renewable energy companies, because we not only develop and build renewable projects, but through our operations and maintenance affiliate - EDF Renewable Services, we intend to operate the facility throughout its operational life.

Our long-term approach means we judge success by our ability to maintain a long and positive partnership with our host community partners and neighbours while generating clean energy. Across Canada, we used this approach to successfully develop 15 wind and solar projects, investing in equity partnerships with municipalities and Aboriginal communities.

Our goal is to develop, build, and operate the Romney Wind Energy Centre in

order to meet this high standard of success. The development team looks forward to meeting with you and sharing more about the project and its benefits to the local community. If you cannot attend the meeting, or if you have a question at any time, please contact us at any time at: **844-55-EDF EN** or **RomneyWind@edf-en.ca**.

Sincerely,

Mark Gallagher, Senior Developer
EDF EN Canada Development Inc.

PUBLIC COMMUNITY MEETINGS INFORMATION

Romney Energy Centre Limited Partnership is proposing to submit a proposal to the Independent Electricity System Operator (IESO) to design, build, and operate the Romney Wind Energy Centre for the generation of electricity under the IESO's Large Renewable Procurement (LRP).

The LRP is a competitive process for procuring large renewable energy projects generally larger than 500 kilowatts. At the conclusion of the LRP, the IESO may award contracts for successful projects up to the specified procurement targets for each renewable fuel: 300 megawatts (MW) for wind, 140 MW for solar, 75 MW for waterpower, and 50 MW for bioenergy.

This notice is being distributed to notify members of the public of a public community meeting that has been scheduled to discuss the LRP proposal. Information regarding EDF EN Canada Development Inc., the Romney Wind Energy Centre, and the meeting details are described below.

This public community meeting is being held as part of the early community engagement requirements of the LRP. The public community meeting will present details about the Romney Wind Energy Centre and its proposed connection line. Representatives of EDF EN Canada Development Inc. will be available to discuss the Project and the overall LRP process. Should Romney Wind Energy Centre be awarded a contract, the Project would need to obtain all required permits and approvals and conduct any further required community engagement activities.

Further details regarding the LRP process are available at www.ieso.ca/lrp

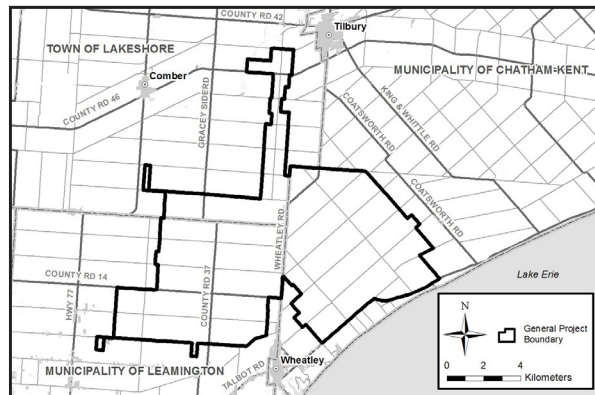

TUESDAY, AUGUST 4, 2015

Collector line only

Millen Community Centre
1925 South Middle Rd,
Lakeshore, ON
4:00 - 8:00 pm

WEDNESDAY, AUGUST 5, 2015

Tilbury Memorial Arena
55 Bond Ave, Tilbury, ON
4:00 - 8:00 pm

PROPOSER:

Romney Energy Centre Limited Partnership (LP)

QUALIFIED APPLICANT FROM THE LRP RFQ STAGE:

EDF EN Canada Development Inc.

NAME OF THE PROPOSED PROJECT:

Romney Wind Energy Centre

RENEWABLE SOURCE:

On-Shore Wind

PROPOSED CAPACITY (MW):

100 MW

PROPOSED CONNECTION POINT:

9km North of the Site, Town of Lakeshore

PROPOSED LOCATION OF THE PROJECT AND CONNECTION LINE:

Municipality of Chatham-Kent, Municipality of Leamington, Town of Lakeshore
